EXPERIENCE

HP Software Technology India, React Developer | Indore (M.P.)

April 2024 – Present

- Developed responsive web applications using **React.js** and **MERN stack**.
- Implemented global state management using **Redux** Toolkit **Integrated REST APIs** with **Axios** and handled **async data** flows
- Converted **Figma designs** into **pixel-perfect** React components
- Built **reusable components** and custom hooks to reduce code duplication
- Deployed applications on **Vercel** and managed code using **Git/GitHub**

Projets

Dashboard System(Political Calender Platform)

Event Management System(Vraksh Mitra Sanstha – NGO) Project

Link <https://vrakshmitra.vercel.app/>

Event Management System(Admin Dashboard)

- Designed and developed web applications to manage events and schedules
- Implemented CRUD operations for event creation and updates
- Added authentication (Login / Signup) functionality
- Ensured fully responsive UI for mobile and desktop devices
- Managed application state efficiently using Redux Toolkit
- Multi-language WebApp (Context Api & react-i18next library) with JSON-based translation)

EDUCATION

B.E. (Electronics & Communication, Bhopal - 2015
Vidhyapeeth Institute of Science & Technology

TECHNICAL SKILLS

Frontend: ReactJS, JavaScript (ES6+), HTML, CSS, JSX

Performance Optimization: LCP, CLS, INP, bundle size, unnecessary re-renders

Concepts: Redux Toolkit, Context API, State Management, Hooks, JWT Auth, CRUD

Styling & UI: Tailwind CSS, Bootstrap Responsive Design, Framer Motion

Routing & APIs: React Router, REST APIs, Axios, API Integration

Backend (Basic): Node.js, Express.js, MongoDB

Database(Basic): MongoDB, SQL

Deployment: Vercel / Netlify / Render

Tools & Platforms: Git, GitHub, VS Code, Chrome DevTools, Cloudinary
